

County Government Client Testimonials

Success Stories Straight from Our Customers

Espy Services has added millions of dollars back to the budgets of counties throughout the United States every year.

"Based on the results of our audit (10% reduction in telecom costs) and the professional manner in which Espy Services has communicated with our staff, I recommend other organizations give Espy Services an opportunity to help audit their phone costs as well."

-County Auditor, Freestone County, TX

"Overall your work is going to generate credits and savings equaling almost 75% of what we spend on telecom in 2010. As we move forward in the future years our costs will be reduced 22% through the efforts of you and Espy Services."

-County Clerk, Miller County, MO

"Every county should take advantage of this incredibly effective tool in order to find hidden overcharges in their telecom billings and to recover the money that is rightfully theirs."

-County Clerk, Bourbon County, KS

"I want to thank you for the audit work your organization performed on our telecommunications billings. In the past, I have found these types of audits to result in a lot of lost time gathering data for review with very little savings for our organization. Working with your organization, I found that there was little time or work involved...the savings found well outweigh the costs we incurred gathering any data or information for your organization...In addition, there is peace of mind in knowing through an inexpensive independent audit process that we were...not being overcharged...to any significant level."

-County Auditor-Treasurer, Stearns County, MN

"The county has benefited with over \$10,000 in credits and refunds, money that Espy secured and got refunded to us in a short period of time. The entire process was very easy for us from beginning to end, with Espy doing most all of the work...Espy added money to our budget and it cost us nothing up front."

-County Administrator, Seward County, KS

"We are all satisfied with the engagement. I have calculated that our county's net savings from Espy's error corrections will be just short of \$90,000 over the next five years... I am pleased to offer a recommendation that all parties responsible for paying telecommunications bills should accept Espy's offer to review those bills for errors and overcharges."

-Finance & Human Resources Director, Hampton County, SC

"I am very pleased to say that with both recovered funds and reduced cost after error correction Espy Services benefited Mason County by 46% of our annual telecom costs."

-Treasurer, Mason County, TX

"Lawrence County is very pleased with the results of our recent telecommunications audit. Having had an audit by one of your competitors a few years ago we did not expect there to be much found in the way of error corrections or funds recovered. But the thoroughness of your auditing services has been outstanding. By simply providing you with the front page of our phone and internet bills you were able to produce savings that will approach \$105,000 over the next three years...We wholeheartedly recommend...Espy Services."

-County Auditor, Lawrence County, IN

The Bottom Line

All fees for Espy Services' work are contingency-based with no up-front, administrative or processing fees. The financial value we create for your county supports our payment...eliminating any financial risk. This approach and unique process have made many happy customers. Our current Google Review rating of 4.7 stars is a reflection of the incredible relationships we have built with our clients...**Call us to find out more!**
