

Telecom Inventory Portfolio

Your Network Inventory

Universe at Your

Fingertips

Due to constant changes at multiple locations, you have no idea what network services, features and costs are at your sites. Since many of the components that make up your services are buried within the vendor customer service records, you will never truly know or understand what you are paying for.

Your boss just asked you to cut 15% from your budget to prepare for a technology upgrade.

What do you do?

LOCATION LEVEL INVENTORY

Espy Services can build you a physical record of all lines, features, circuits and contracts from your vendor invoices and customer service records; categorized by type of service.

IMPROVED DECISION MAKING

Successfully carry out daily operations and efficiently plan for future growth & improvements.

STOP LOSING TIME & MONEY

Maintaining outdated & expensive services and technology costs money. Plus, who has the time to dig into the records to find out what you really have?
