

Financial Services Expense Analysis

Your Key to Discovering Lost Revenue

When was the last time you scrutinized your financial services vendors for accuracy and potential cost reductions? More often than not you're over paying for services because you either don't need them or you're being billed for fees & rates that are not competitive.

Your boss just asked you to reduce your budget by 20%.

What do you do?

COST SEGREGATION SERVICES

Get an immediate increase in cash flow, a reduction in current tax liability, a deferral of taxes and the ability to reclaim "missed" depreciation deduction from prior years.

VIRTUAL CARDS

Would you like the opportunity to earn revenue by simply paying your invoices? Espy Services has the ability to introduce you to a new way of paying invoices that is more secure, reduces AP costs, makes invoice reconciliation easier and provides you rebates that your current ACH and check payments do not provide.

MERCHANT SERVICES AUDIT

Reduce your credit card processing fees without changing your processor. Our team will provide you with a multipoint analysis of your fees...that have nothing to do with your negotiated rates. Let us find you these savings on a contingency basis.
